3. How the shortlist was built

Each organisation reached this list because of at least one supported event in the window: a new CQC registration, an overall rating change, or a newly published inspection report. The opportunity score combines the event type, how recent it is, the direction of any rating move, the size of the location, and whether the same provider has several locations moving at once. Appendix A gives the full reason and the evidence for every organisation, in rank order.

4. Territory insights

Aggregate view of the whole opportunity set (not just the shortlist).

Events by type new_registration: 30

Rating moves 0 downgrades, 0 upgrades

New beds entering market 457

Service-type mix in the opportunity set:

Service type	Organisations
Care home service without nursing	8
Care home service with nursing	6
Domiciliary care service	6
Doctors consultation service	4
Supported living service	3
Dental service	2

No single provider has more than one location moving in this window.

5. Recommended next actions

Practical, evidence-bounded. These are based on the signals in this brief and do not assume any provider is in difficulty or seeking a supplier.

1. Review the 30 newly registered location(s) first. The registration date is a research signal only; verify the current record and any explicit supplier need before considering contact. The shortlist links each CQC record.
2. Verify each organisation's current status on the linked CQC page before outreach - this brief reflects the published register edition, not a live lookup.

6. Methodology and data notes

- Scope: local authority = Fixture County. Window: 2026-07-25 to 2026-10-22 inclusive (90 days), anchored to the newest source date.
- Supported events: new CQC registration in-window (excluding dormant locations); overall rating change in-window (derived from ordered historic/current ratings); new inspection report in-window where no change can be derived.
- Score recency is measured against generation, not the source window. Score = base weight per event x recency multiplier (1.5 within 30 days, 1.2 within 90, 1.05 within 180) + rating-direction adjustment (downgrade +16, upgrade +9) + a bed-count size factor + a provider-cluster bonus where the same provider has multiple locations moving. Scores are capped at 100.
- One location represents each provider: highest score, then most recent event date, then organisation name, then lexicographically smallest CQC location id. Deduplication happens before the shortlist limit. Ties break by those same keys, so the same source data always yields the same ranking.

7. Limitations and disclaimer

- Only CQC-dated rating movements are counted.
- Rating freshness is measured against the generation date, separately from the source window. Stale RI records remain visible in evidence coverage, outside the shortlist when they have no in-window signal. Missing metadata describes the supplied snapshot, not a claim that CQC never published it.
- This brief reflects the published CQC register edition dated 2026-10-22 (the newest date present in the source), not a live API lookup.
- The register carries the latest rating and its report date. Where no rating history is present a change cannot be derived, so a first/refreshed rating is reported as a new inspection report rather than a rating change.
- Organisations with incomplete provider identifiers or names in the source are excluded from the shortlist rather than shown with gaps.
- Opportunity signals indicate where to investigate first; they are not statements about a provider's quality, finances, or intent.
- Contains public sector information licensed under the Open Government Licence v3.0.

CareGist is independent of the Care Quality Commission. This brief is compiled from the published CQC register and is provided for business research. It is not regulatory, legal, financial, or investment advice, and it makes no statement about any provider's quality, solvency, or intentions. Opportunity signals indicate where a buyer may wish to investigate first. Verify every organisation's current status directly with CQC before acting.
