3. Method and sources

- Services: ACTIVE CareGist directory records of the selected type whose location point lies within the radius (PostGIS distance on the CQC-published coordinates).
- Ratings: the most recently published overall rating across CQC's API and CQC's published ratings file. Inherited ratings are labelled; where the sources conflict no rating is shown.
- Movement: registrations and registration endings in CQC's location export within the same radius; endings are classified as confirmed closures, re-registrations, dormant or unresolved.

4. Independence, licence and limitations

CareGist is independent of the Care Quality Commission (CQC). This scan is compiled from CQC's published register and ratings data; CQC has not produced, reviewed or endorsed it.

Ratings and counts describe what CQC has published. They are not statements about any service's current quality, finances or intentions. Verify each record with CQC before acting.
